HIGH YIELD PREMIUM BENTONITE

PRODUCT DATA SHEET

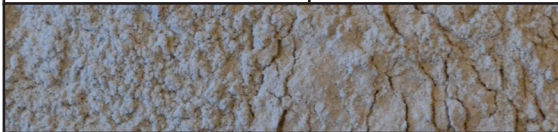

MEGA-GEL® is an easy-to-mix high yield premium Bentonite, designed for fresh water drilling and boring applications. MEGA-GEL is a (200-mesh) Wyoming sodium Bentonite. It is blended with special extenders that more than doubles its viscosity compared to regular Wyoming Bentonite. MEGA-GEL is a versatile viscosifier that is effective in a variety of drilling applications including Mineral exploration, drilled shafts, water well, and directional drilling operations.

MEGA-GEL is a high yielding bentonite viscosifier with a 220-230 barrel yield. MEGA-GEL mixes fast for rapid hydration in fresh water.

BENEFITS
